

Lafayette Utilities System

WASTEWATER, Residential non-City Service: Schedule S-1-O

Effective date: Nov. 2010

Ordinance Section: 94-176

(a) Availability: The S-1-O rate schedule is available to all customers with service points outside the corporate limits of the City of Lafayette at residential premises connected to the sanitary wastewater system.

(b) Monthly volumetric charge: The monthly volumetric charge shall be \$6.79 per 1,000 thousand gallons of water used.

(c) Monthly customer charge: In addition to the volumetric charge, customers will be charged \$6.72 per month for service.

(d) Determination of use:

(1) For the months of December, January, February and March, the monthly charge for residential wastewater service will be computed on the actual water used for these months.

(2) The monthly charge for residential wastewater services in the months of April, May, June, July, August, September, October and November will be computed on the average water usage for the four (4) preceding winter months of December, January, February and March, or for such portion of said winter months as may have been metered, or at actual consumption, whichever is the lesser. However, in no case shall the usage be less than seventy-five percent (75%) of actual water consumption for the use month. If during the months of December, January, February, and March severe weather or unusual conditions result in abnormal fluctuations in water consumption for a customer, then a reasonable method of averaging water usage as mentioned in this section may be determined by the director.
